## Can we have a Turing test for thick machines?

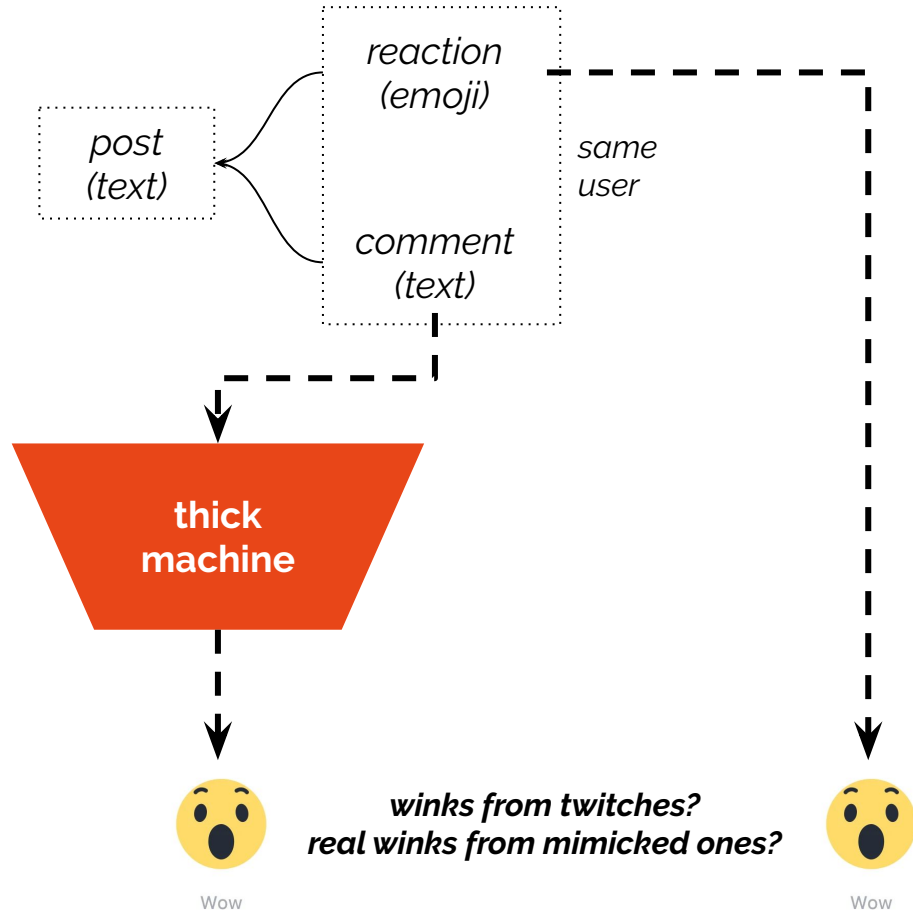

Geertz, C. (1973). *The Interpretation of Cultures*, p.16

*The claim to attention of an ethnographic account does not rest on its author's ability to capture primitive facts in faraway places and carry them home like a mask or a carving, but on the degree to which he is able to clarify what goes on in such places (...) This raises some serious problems of verification, all right--or, if "verification" is too strong a word for so soft a science (I, myself, would prefer "appraisal"), of how you can tell a better account from a worse one. But that is precisely the virtue of it. **If ethnography is thick description** and ethnographers those who are doing the describing, **then the determining question for any given example of it (...) is whether it sorts winks from twitches and real winks from mimicked ones.***

# The Atlas of Danish Facebook Culture

A reaction to the 2018 Facebook APIcalypse

---

# What is Danish Facebook?

- 25.000.000 posts by 71.265 Danish pages in the period 2012-2018
- 128.000.000 comments
- 700.000.000 like reactions
- 23.500.000 emoji reactions

# Building a subset for The Thick Machine - 1

**Input:** The Atlas of Danish  
Facebook Culture

**Filter:** Pairs of emoji reactions and  
first comments on made on the  
same posts by the same users.  
Length of post text > 50  
characters AND comment text >  
50 characters

**Output:** 700.000  
reaction/comment pairs

Emoji reaction

First comment  
by same user

—

# Building a subset for The Thick Machine - 2

**Input:** 714.000 emoji  
reaction/comment pairs

**Filter:** Balance the amount of  
reactions to get an even  
distribution

**Output:** 175.000 emoji  
reaction/comment pairs  
(35.000 for each reaction type)

# Under the hood

## sklearn.neural\_network.MLPClassifier

```
class sklearn.neural_network.MLPClassifier(hidden_layer_sizes=(100,), activation='relu', solver='adam', alpha=0.0001,
batch_size='auto', learning_rate='constant', learning_rate_init=0.001, power_t=0.5, max_iter=200, shuffle=True,
random_state=None, tol=0.0001, verbose=False, warm_start=False, momentum=0.9, nesterovs_momentum=True,
early_stopping=False, validation_fraction=0.1, beta_1=0.9, beta_2=0.999, epsilon=1e-08, n_iter_no_change=10, max_fun=15000)
```

[\[source\]](#)

### Multi-layer Perceptron classifier.

This model optimizes the log-loss function using LBFGS or stochastic gradient descent.

New in version 0.18.

**Parameters:** **hidden\_layer\_sizes :** *tuple, length = n\_layers - 2, default=(100,)*  
The ith element represents the number of neurons in the ith hidden layer.

**activation :** *{'identity', 'logistic', 'tanh', 'relu'}, default='relu'*

Activation function for the hidden layer.

- 'identity', no-op activation, useful to implement linear bottleneck, returns  $f(x) = x$
- 'logistic', the logistic sigmoid function, returns  $f(x) = 1 / (1 + \exp(-x))$ .
- 'tanh', the hyperbolic tan function, returns  $f(x) = \tanh(x)$ .
- 'relu', the rectified linear unit function, returns  $f(x) = \max(0, x)$

**solver :** *{'lbfgs', 'sgd', 'adam'}, default='adam'*

The solver for weight optimization.

- 'lbfgs' is an optimizer in the family of quasi-Newton methods.
- 'sgd' refers to stochastic gradient descent.
- 'adam' refers to a stochastic gradient-based optimizer proposed by Kingma, Diederik, and Jimmy Ba

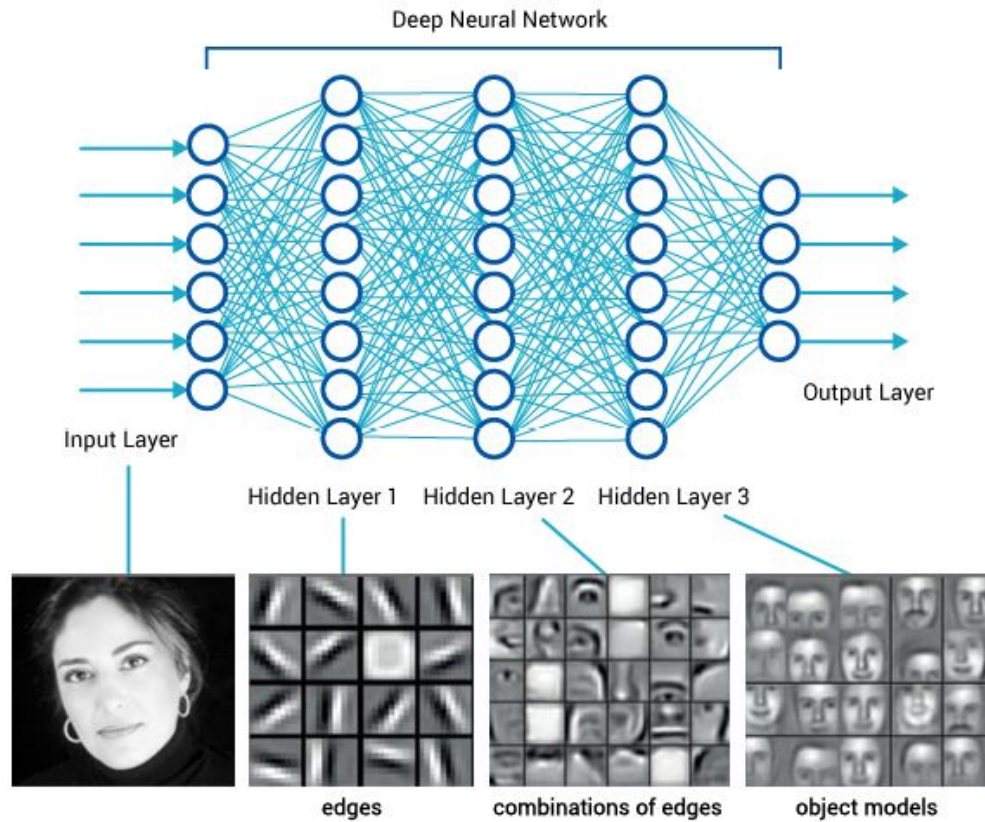

We use SciKit Learn's  
**MLPClassifier**, aka  
“Multi-layer Perceptron classifier”

<https://analyticsindiamag.com/a-beginners-guide-to-scikit-learns-mlpclassifier/>

[https://scikit-learn.org/stable/modules/generated/sklearn.neural\\_network.MLPClassifier.html](https://scikit-learn.org/stable/modules/generated/sklearn.neural_network.MLPClassifier.html)

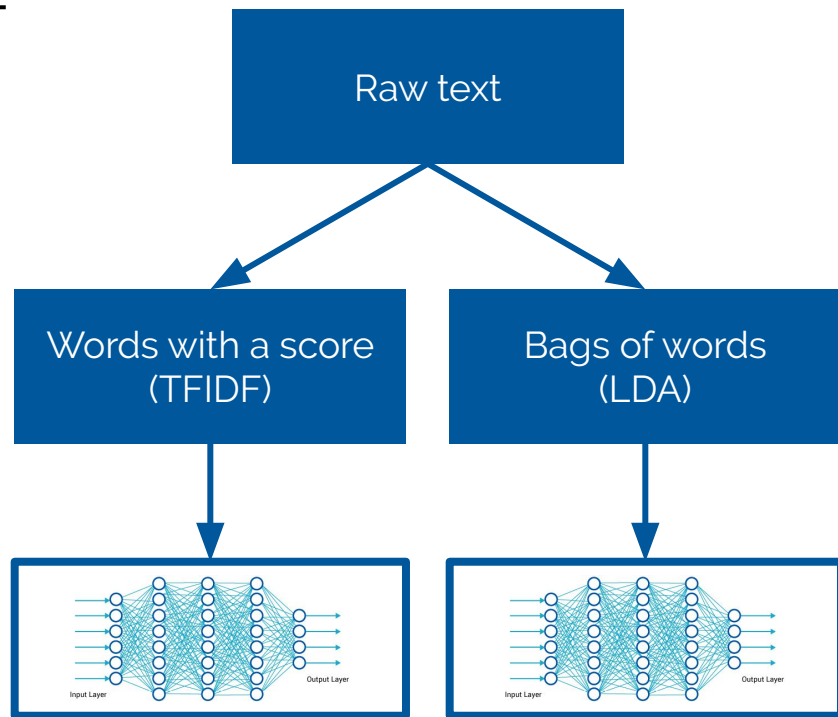

*Different classifiers have different behaviors*

---

*MLPClassifier is a **neural network** with multiple (hidden) layers.*

---

*"In machine learning, ... **feature extraction starts from an initial set of measured data and builds derived values (features) intended to be informative and non-redundant**, facilitating the subsequent learning and generalization steps, and in some cases leading to better human interpretations." - Wikipedia*

*Vectorization. Turning text into features (think: columns with numbers).*

---

Occurrences\_of\_the\_word\_in\_doc

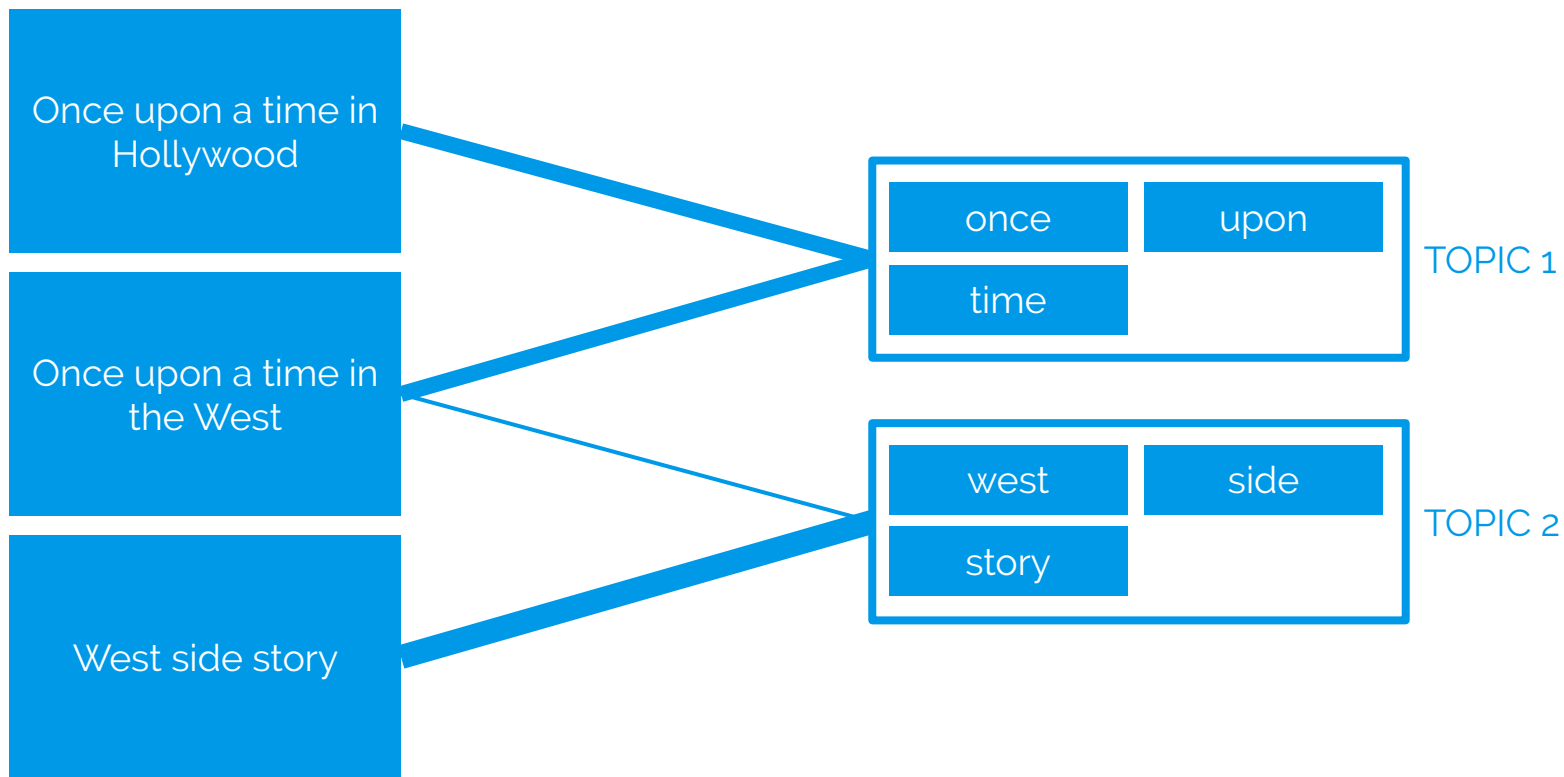

$\log( \text{Doc\_containing\_word} / \text{All\_doc} )$

	once	upon	time	west	side
Once upon a time in Hollywood	$1/\log(2/3)$	$1/\log(2/3)$	$1/\log(2/3)$	0	0
Once upon a time in the West	$1/\log(2/3)$	$1/\log(2/3)$	$1/\log(2/3)$	$1/\log(2/3)$	0
West side story	0	0	0	$1/\log(2/3)$	$1/\log(1/3)$

*Text Frequency x Inverse Document Frequency (TFIDF)*

---

*Latent Dirichlet Allocation (LDA)*

---

---

# Unexplainable machines?

---

## Learning Techniques (today)

## Explainability (notional)

<http://nautil.us/issue/40/learning/is-artificial-intelligence-permanently-inscrutable>

A trade-off between **accuracy** and **explainability**

---

Figure 1. Hypothetical-deductive machines (1) and inductive machines (2)

Cardon, D., Cointet, J. P., & Mazières, A. (2018). *Neurons spike back*. *Réseaux*, (5), 173–220.

With **inductive machines**, the outcome is the program.

---

---

# Post-hoc interpretations

Lipton, Z. C. (2016).  
*The Mythos of Model  
Interpretability, (Whi).*  
Retrieved from  
<http://arxiv.org/abs/1606.03490>

"While post-hoc interpretations often do not elucidate precisely how a model works, they may nonetheless confer **useful information for practitioners** and end users of machine learning. Some common approaches to post-hoc interpretations include natural language explanations, **visualizations of learned representations or models**, and explanations by example (*e.g. this tumor is classified as malignant because to the model it looks a lot like these other tumors*)."

**Machines for  
explanation or  
explication?**

---

---

# 'Thickness' ≠ passing for a native

Geertz, C. (1973). *The Interpretation of Cultures*, p.11

*Variously called ethnoscience, componential analysis, or cognitive anthropology (a terminological wavering which reflects a deeper uncertainty), this school of thought holds that culture is composed of psychological structures by means of which individuals or groups of individuals guide their behavior. "A society's culture," to quote Goodenough again, this time in a passage which has become the locus classicus of the whole movement, "consists of whatever it is one has to know or believe in order to operate in a manner acceptable to its members." And **from this view of what culture is follows a view, equally assured, of what describing it is--the writing out of systematic rules, an ethnographic algorithm, which, if followed, would make it possible so to operate, to pass (physical appearance aside) for a native.** (Geertz 1973:11)*

---

# Predicting when reaction is

*Machine: PASSING FOR  
A NATIVE*

*Situation: SHALLOW*

## POST (translated):

..... Christmas present of the  
century 🙏🙏🙏🙏🙏🙏🙏🙏🙏🙏🙏  
🙏🙏🙏🙏🙏🙏🙏🙏🙏🙏🙏  
🙏🙏🙏🙏🙏🙏🙏🙏

Bimse & Hyacinth will be deeply moved ❤️

THANK YOU SO MUCH 🥹🥹🥹

## COMMENT (translated):

Bimse totally agrees that this is the  
Christmas present of the century 🥰🎄🧑🏻‍🎅🕯️  
merry Christmas everyone ❤️🙏

---

# Predicting 🍌 when reaction is 🍌

**Machine: PASSING FOR  
A NATIVE**

**Situation: SHALLOW**

## POST (translated):

We have filled our 12 storage facilities with road salt, and from October 1st our winter crew is ready to move out when frost and snow hit the roads. Here is a sneakpeak from the salt storage. On average 15 tonnes of salt in each hall. Enough salt for approximately 1 billion egg sandwiches 😊

## COMMENT (translated):

Why don't you cut the crap and make people learn to drive instead! 🍌

---

---

# Predicting when reaction is

***Machine: FAILING TO  
PASS FOR A NATIVE***

***Situation: DEEPER***

## POST (translated):

For the Prince, the decision not to be buried next to the Queen is the natural consequence of not receiving the same treatment as his spouse when it comes to the title and function he has always desired, says chief of communications for the Royal House, Lene Balleby.

## COMMENT (translated):

I will gladly swap problems with him. Happy to refrain from a royal title in exchange for 8 mio a year. Or just the 29 mio for the sarcophagus. Then he can fight my [beep] ex and the system without getting as much as a penny from in return. Get a real problem, King Carrot.

---

---

# Predicting when reaction is

**Machine: FAILING TO  
PASS FOR A NATIVE**

**Situation: DEEPER**

## POST (translated):

It's autumn. You're out running and see this pile of fallen leaves :D ...

Are you the type that runs through or around it...?

## COMMENT (translated):

Definitely through the pile. It's the most fabulous sound of autumn 🥰🍂🍁

---

# Predicting when reaction is

**Machine: FAILING TO  
PASS FOR A NATIVE**

**Situation: DEEPER**

## POST (translated):

Do you know someone in need of cleaning out the bedroom? Many of our clients demand a special section for adult toys. (...) That is why we're opening a new initiative on the first floor of Børneloppen [flea market for families with kids]. Finally you can sell your private equipment in a discreet and efficient manner.

Toys should be unused or washed with soap. We recommend that you bring batteries since toys that can be tested sell better.

## COMMENT (translated):

     Stine [surname redacted] we have to go and see if we can make room for some new stuff     

---

# Repurposing algos as explication machines?

THANK YOU

---

---

# EXTRAS

---

# Predicting when reaction is

**Machine: PASSING FOR  
A NATIVE**

**Situation: SHALLOW**

## POST (translated):

👉😄😍COMPETITION😍😄👉

You and your friend now have the chance to win the beatieful blouses from Molly Jo.

You will win a bordeaux and a blue one, that way you can wear different colours.

(...)

👉 Tag your friend who deserves a treat 😍

(...)

---

## COMMENT (translated):

Red size m and blue size 38 to my friend Karen [surname redacted].❤️❤️❤️.

---

# Predicting when reaction is

**Machine: PASSING FOR  
A NATIVE**

**Situation: SHALLOW**

## POST (translated):

We wish you an amazingly merry Christmas Eve with your loved ones 🌲 ❄️

►► Question of the day!: Who would you spoil with an extra present 📺 🧑🏻

Answer the question and participate in the competition for 2 x 600.- gift cards to sackit.dk (total value of 1200.-) 🎧 🎵 🧑🏻

## COMMENT (translated):

My lovely husband Poul [surname redacted] who supports me everyday after I injured my back and now need help to do so many things. If anyone really deserves to be spoiled it is him ❤️ Crossing everything I've got and hoping this will be my lucky time 🙌  
🙌 🍀 🍀 🍀 🍀 ❤️

---

# Predicting when reaction is

***Machine: FAILING TO  
PASS FOR A NATIVE***

***Situation: DEEPER***

## POST (translated):

This summer the teachers won't even get to see the test assignments for their own students. The evaluation is left entirely to the assessors. What will this mean?

## COMMENT (translated):

But - why? Perhaps there will also come a day where we are no longer allowed to teach our own students?

---

---

# Predicting 🙄 when reaction is 🙄

*Machine: PASSING FOR  
A NATIVE*

*Situation: SHALLOW*

## POST (translated):

Smart: Text a live chicken to a poor family!

Text CHICKEN to 1911 (20 kr), and donate a chicken. This way you help them help themselves.

Do write a comment in the thread below if you choose to send a chicken! Happy easter!

## COMMENT (translated):

How many "chickens" end up as administration costs or fat salaries for management?

---

# Predicting when reaction is

**Machine: PASSING FOR  
A NATIVE**

**Situation: SHALLOW**

## POST (translated):

Then it f..... Happened again again    
burglary at the club house   .

Damit I hope you throw up from all the  
beer/soda you stole.

Could you for fuck sake find something else  
to do than ruining it for others   

## COMMENT (translated):

Arghhh...god damn it how annoying

---

# Predicting 🥲 when reaction is 🤣

**Machine: FAILING TO  
PASS FOR A NATIVE**

**Situation: DEEPER**

## POST (translated):

UPDATE: The driver who was involved in the car crash has now passed away.

## COMMENT (translated):

Andreas [surname redacted] 🥲 so it was pretty bad after all

---
